

### **Future Walk Presentation**

Bill Buell provided a presentation on the New Richmond Community Foundation's Future Walk initiative. The presentation included information on how the foundation board researched their community engagement approach leading to more than 300 public interviews. Their engagement efforts resulted in approximately six main focus areas of community enhancement opportunities.

In addition to the similarities of the two engagement processes, there were also very similar outcomes including community services, parks and trails, and economic development.

### **Project Portfolios**

Todd explained the purpose of the next phase of the process focusing on the development of Project Portfolios. The portfolios will provide more details on the committee's concepts including project description, who benefits, what funding sources may be available, and estimated cost breakouts. Portfolios will be developed for each specific committee concept or recommendation. These portfolios will be used to attract wider community involvement, support and funding.

### **Transportation Discussion**

A large group transportation discussion focused on a wide variety of pedestrian and traffic interaction concerns.

### **Committee Breakouts**

Committees continued working on their value, vision, and guiding principle statements and initial development of their concept's Project Portfolio.

### **Prep for Next Meeting**

Committee members will continue to develop their Project Portfolios.
